Subject: Notice for Class 9

There will be no new material for Class 9. Instead, for the first hour, we will be finishing up our discussion on Kepler's second and third laws of planetary motion. There were a few minor typos in the Class 8 slides. They have been fixed; please download the corrected file, labelled `08-gravitation-rev1.pdf`. In the second part of the class we will do a mock AP Physics C: Mechanics exam. The exam is 90 minute long, with 45 minutes of multiple-choice questions (35 questions) and 45 minutes of free-response questions (3 questions). The mock exam will be marked and returned to you at the next class. The equations (`09-equations.pdf`) that you will need are also downloadable from the school website.

Beginning in Class 10, we will discuss topics in AP Physics C: Electricity and Magnetism. Once we have finished these topics, we will do another mock exam.

Please come to class on time.

Tim
